SMALL WINERY EXEMPTION INFORMATION AND APPLICATION

Utah Code Annotated section 32A-1-122 provides that the state shall mark up, in an amount of not less than 30% above cost, to small wine producers. To qualify for this mark up, the winery must produce less than 20,000 gallons of wine in any calendar year, verified by the Utah Department of Alcoholic Beverage using the federal (BATF) or other verifiable production reports.

The following documents are required:

1. Copy of your Bureau of Alcohol, Tobacco, and Firearms Basic Permit (ATF FORM 1631).
2. Copies of the following: Federal Excise Tax Return (ATF FORM 5000.24A) for the previous year (if filed monthly all 12 forms) and the Report of Wine Premises Operations (ATF FORM 5120.17) for the previous year, and other verifiable bulk wine purchase receipts or other types of production reports.
3. Signed and notarized Affirmation Statement.

AFFIRMATION STATEMENT

I affirm that the annual production of this winery does not exceed 20,000 gallons per year and that the forms I have submitted are true and accurate and meet the requirements of the Utah Code Annotated sections 32A-1-122 (3).

I understand that once granted, my Small Winery Exemption expires at the end of each calendar year, and/or should I increase my production above the exemption limits, I will inform the Utah Department of Alcoholic Beverages and the full 64.5% markup will be immediately imposed on all of my products for sale in the State of Utah.
